PROFESSIONAL SUMMARY

I was fortunate enough to grow up and receive an education in multiple countries and scenarios, which is what made me into the resilient, adaptable and sociable person that I am today. I always try to improve what is around me, myself included. That was the reason that pushed me to enter the world of data. My mission is to become able to leverage information to help myself and others in developing a clearer, more precise and data-driven vision of what is to come in today's fast paced and volatile world. I am currently studying to obtain an AWS cloud practitioner certification.

EDUCATION

IE SCHOOL OF HUMAN SCIENCE AND TECHNOLOGY

MADRID, SPAIN

Master in Big Data and Business Analytics

APRIL 2020 – MARCH 2021

- Joined the Big Data and AI Club and became a published author, interested in machine learning applications, cloud and distributed computing.
- Acquired skills include programming in Python and R, SQL data modelling, Git collaboration, data visualization, statistical analysis, network analysis, experience with Hadoop, Spark and Kafka.

UNIVERSITY OF WESTMINSTER

LONDON, UK

BA in Management and Finance

SEPTEMBER 2015 – JULY 2019

- Dissertation Title: Innovation, Regulation and Trust in the Financial System: a Study of Financial Technologies.
- Relevant Coursework in Finance: Corporate Financial Management, Global Economic Issues, International Investments, Banking Theory and Practice, Global Financial Markets and Institutions, Sustainable Business, Law and the Business.

PROFESSIONAL EXPERIENCE

VITROSCREEN (WWW.VITROSCREEN.COM)

MILAN, ITALY

Management Trainee, Later P.A. to CEO

MAY 2016 – PRESENT

- Supported and advised management during a conference in Seattle, WA. in 2017, pitched our company to potential clients and took part in initial talks regarding a possible JV.
- Aided the CFO in developing Excel models to automate a paper-based process for tracking KPIs such as operating efficiency, PnL components, inventory turnover and profitability per costumer, this helped in reducing costs as it was a faster and less capital-intensive process.
- Negotiated with both potential clients while communicating our value proposition as well as with suppliers and service providers regarding contractual obligations. Such experience improved my client facing abilities.
- Researched the Chinese market for in-vitro testing to consider launching a company spinoff for the Asian chemical and pharmaceutical sectors. I wanted to show and test my ability to deliver quality work on unknown material.

SHINING CONSULTING (WWW.SHININGCONSULTING.COM)

BENGALURU, INDIA

Summer Business Analyst

JUNE – AUGUST 2015

- Conducted research and analysis of sales data to help develop a strategy for a major Indian telecom player looking to expand its market share. This gave me an initial understanding of how research is conducted in a work environment.
- Modelled customer preferences in the Asian market to aid R&D for a new model by Mahindra Two Wheelers, autonomously gained data by surveying customers and dealerships staff.
- Discovered differences in the wants and needs of businesses depending on geographical location and cultural background.

LANGUAGES

Italian (Native); **English** (Fluent); **Spanish** (Basic)
